

Atari Bit Byter User Club e.V.

Information about the club

The ATARI Bit Byter User Club presents:

The ABBUC e.V. is the biggest **ATARI 8-Bit User Club worldwide**. It has more than 400 members, who still like their ATARI home computers. The ABBUC e.V. was founded 1985 in Herten (Germany), and therefore most of its members are from Germany. But there are also many from around the world, with whom the club keeps contact. In 2015 the 30th anniversary was celebrated! 30 years together with and all for the „small“ ATARI computers!

There are several regional groups, e.g. in Hamburg, West (Cologne) and Frankfurt. These local groups consist of interested active members from a certain region, who meet regularly (e.g. monthly or every two month). Here you have the possibility to exchange information, play old -and new- games, help each other and have much fun!

Also, the club provides several specialists for floppy disk drives, hardware, printers etc. If a piece of your valuable hardware is malfunctioning, these specialist can help you and most of the time also repair the devices. You only pay the parts and shipping to and from.

Four times a year a disk-magazine with a 5,25“ disk full of programs and texts with printed supplement is published and sent to all members via mail. Even more, two times a year a special edition, usually consisting of a software package or book(let) is also sent to you!

With you membership you gain access to special member areas on our website, containing schematics/plans, archived magazines, library, programs, infothek (wiki). If you want, you can even have an email address like name@abbuc.de !

The fee is only 2,60 € per month, which is **only 31,20 €** per year! From abroad, you can pay via Paypal or international money order. Shipping/postage is included in the fee! Remark: the fee was not raised since the ABBUC was founded!
Unbeatable!

Now you are curious? Remembering your old ATARI in the basement or in the attic? Want new fun? Sign on for your membership!

Via Mail (Old school):
ATARI Bit Byter User Club e.V.
